

# ADDIPEL ONE-PAGER: 100% NON DUST BLENDS

## Benefits For Our Customers:

- Productivity
- Quality
- Health & Safety
- More Efficient Stabilization
- Reduce Waste
- Intellectual Property Protection

## FEATURES

- Multiple component, fully dispersed, low dusting / compacted pellet
- Compaction process will not heat cycle components

## ADVANTAGES

- Pellet form:
  - improves material handling (powder is difficult to handle)
  - allows for less material handling (handle 1 NDB vs. multiple components)
  - allows for better dosing accuracy (reduce over / low dosing of powdered additives)
  - improves feeding of material into extruder (powder is sometimes difficult to meter and is less "free flowing")
  - minimizes dust exposure to personnel (dust is 1 of top 3 OSHA risks)
- Low dust environment = low risk of dust explosion
- Protection of proprietary formulas for toll compounders
- Better blend homogeneity vs. powder

## BENEFITS

- Better overall cleanliness in manufacturing plant
- Better overall safety practices
- Better dosing accuracy results in an increased production of "in-spec" product (NDB's reduce human error)
- Product synergy = more efficient stabilization
- Reduced cost associated with material loss

### PRODUCT OVERVIEW

- No carriers
- Won't heat cycle components
- Based on customer formulations

### CAPABILITIES

- Compaction Mills
- Liquids can be added to formulas
- Wide variety of packaging options

### TARGET INDUSTRIES

- Plastic compounding
- Resin manufacturers
- Plastic recyclers
- Rubber
