CUSTOM ADDITIVE BLENDING

Addipel is a manufacturer of custom dry blends, 100% active non-dust blends, and 3D printing and additive manufacturing materials. We offer a wide range of formulated products for customers in the plastics, adhesives, coatings, aerospace, automotive, rubber and composites industries. We work closely with our clients to develop custom formulations to meet the needs of their specific applications.

APPLICATIONS

- **PLASTICS**
 - Resin Producers
 - Compounders
 - Additive Concentrates
 - Wood Plastics Composites
- **SEALANTS & ADHESIVES**
- **3D PRINTING & ADDITIVE MANUFACTURING MATERIALS**
 - SLS (Selective Laser Sintering) Powder Materials – Plastics, Metals, Ceramics
 - FDM (Fused Deposition Modeling)
 - SLA (Stereolithography)
- **COMPOSITES**
- **RUBBER**

PRODUCTS

- **Dry Blending**

Addipel products are custom formulated based on the specific needs of our clients. With your specified raw materials, we can dry blend on high or low speed mixers to meet the needs of your application. Products can be packaged in a wide variety of ways to best meet your needs.

- **100% Active Non-Dust Blends**

Customers that require dust-free environments can utilize Addipel's 100% active non-dust blends. These products do not have any carriers, and therefore can optimize your cost. Furthermore, because of our process, our 100% active non-dust blends do not heat cycle your components. These products are friable and break down in your production process.

WHY ADDIPEL?

CONSISTENT PRODUCTS

- Less than 0.01% product returned over past 5 years

CONSISTENT DELIVERY

- 99.4% on time, in full delivery performance over 5 years
- No minimum order quantities

CONSISTENT SUPPLY

- Lead times of as little as 24 hours
- Reduce your working capital

CAPABILITIES

Wide Range of Processing Capabilities

- Ribbon Blenders
- High-Speed Mixers
- Compaction Mills
- Extrusion
- Custom Packaging

Materials We Typically Process:

- UV Absorbers
- HALS
- Antioxidants
- Slip Aids
- Lubricants and Waxes
- Mineral Fillers
- Flame Retardants
- Anti-Blocks
- Anti-Static Agents
- Clarifiers
- Nucleating Agents
- Heat Stabilizers
- Metal Powders
- Plastic Resins

Addipel offers a wide range of formulated products for customers in the plastics, adhesives, coatings, aerospace, automotive, rubber and composites industries.
