## ActiMax™ Product Guide

### Heat Stable 20B Live Yeast

#### What is ActiMax™?

#### One of the highest concentrated products in the market!

- A 20 billion CFU/g thermal resistant stable live yeast.

#### Specifically Developed for its Function!

- ActiMax is a live-action probiotic. It was specifically developed to enhance diet digestibility (especially fiber), increase feed intake and moderate rumen pH improving animal performance and thus profit potential.

#### Micro Yeast Coating for Durability:

- ActiMax uses a micro yeast coating to enhance stability during pelleting, protect it from moisture, and ensures safety and compatibility in mineral premixes. It is also packaged in a vacuum sealed bag to ensure stability. This delivers a superior, durable, and dust-free product.

#### Key Benefits in Ruminants:

- Improved fibrolytic activity
- Increased DM intake
- Moderation and stabilization of rumen pH
- Enhanced milk yield, components, and efficiency

#### Key Benefits in Sows & Piglets:

- Improved fiber digestion
- Enhanced performance
- Optimized immunity
